Cell and Gene
Therapy Solutions

Why You Should Partner With Us for Your Autologous Collections Needs

As a nationwide leader in the provision of autologous collection services for cell and gene therapy, the Red Cross can support your efforts from discovery through commercialization.

Extensive Experience

- More than 10 years of experience and over 45,000 collections in support of clinical trials and commercial cell therapy products
- We are the largest single provider of autologous Mononuclear Cell Collections in support of Cellular Therapy and perform collections for FDA approved cell therapy products—Provenge, Kymriah and Yescarta

Nationwide Collections

- 62 Red Cross collection sites—Red Cross's nationwide footprint offers expansion opportunity
- Collection services available at Red Cross sites, hosting institution or Principal Investigator's facility

Standardized Quality Approach

- All collection sites operate under one Quality Management System and one set of national procedures resulting in a simplified audit process

Testing Capability

- Single source for customer-specific testing requirements, including IDT and CBC testing

Customization Capability

- Custom subject, patient and or product sampling services available
- Strict adherence to client's collection manual, including packaging and shipping requirements

Experienced Nursing Staff

- Skilled nursing staff experienced in apheresis collections via peripheral or Central Venous Catheter (CVC) access and in performing CVC dressing changes
- Utilization of staff across geographies ensures appropriate nationwide coverage

Central Client Relationship Management

- Centralized account management at Red Cross Biomedical HQ ensures single point of contact and standardization in services across our sites

Flexible Contracting Arrangements

- Direct contracting with trial sponsors allows for rapid onboarding of new Principal Investigators or hosting institutions, while direct billing structure improves cost management
- Direct contracting with hosting institutions also available
- Support ease of patient journey by offering collection services closer to home
